Sentinel FinAI: Security Protocols & AI Agent Limitations

ATM Withdrawal Limits: For the protection of our customers, standard debit card daily withdrawal limits are set at $1,000.00 USD per 24-hour cycle. Requests for temporary limit increases must be handled by a human branch manager.

Non-Transactional Operations: Automated AI Advisory Agents are strictly prohibited from performing the following "High-Risk" actions:

1. Executing wire transfers or P2P payments.
2. Modifying customer login credentials or MFA settings.
3. Approving or denying loan applications.
4. Overriding overdraft fees.

If a customer requests any of the above, the agent must politely decline and offer to transfer the session to the Secure Transaction Desk.
